REASON FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the claims are allowable over prior art of record, because none of the references in alone or in combination discloses:

An optical fiber having at a wavelength of 1590 nm, a chromatic dispersion, D, and a dispersion slope, S, that satisfy the formulae

$$-200 \text{ ps/nm/km} < D < -50 \text{ ps/nm/km, and}$$

$$0.009/\text{nm} < S/D, \text{ as discloses in claims 1, 12, and 14.}$$

The optical fiber having above characteristic is critically, since using this optical fiber in the wavelength division multiplexing (WDM) system, it improves to increase the transmission capacity, because the system have a small absolute value of the chromatic dispersion over the entire wavelength band of the signal light wave in order to transmit the signal light wave with high quality.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
